Plants Vocabulary

**The Stem**
The stem holds the plant up. It also transports water and nutrients from the roots to the leaves.

**The Leaves**
The leaves make food for the plant using sunlight and carbon dioxide from the air.

**The Roots**
The roots anchor the plant into the ground. They absorb water and nutrients from the soil.

**The Flower**
Flowers make seeds to grow new plants.

**Bud**
A bud is an undeveloped shoot from which leaves or flower parts grow.
