Year 5 Newsletter

Week of: November 5 - 9

Homework

- Maths: Revise previous homework to prepare for the test.
- English: Complete the worksheets on past tense and the reading comprehension.
- Science: Revise previous homework to prepare for the test.

This Week’s Focus

English

- Continue our unit on information texts.

Maths

- We will have a math test this week on the units taught so far. The topics include: place value to 2 decimal places; adding and subtracting 4 digits; multiplying by 10s and 100s; using a 24 hour clock; converting mm, cm, m, km; and finding perimeter.
- We will revise in class this week.

Science

- We will have a science test this week on Human and Animal Life cycles. We will be revising in class.
- Students should be familiar with the different stages of life; similarities and differences between different animals, and be able to describe some life cycles in detail. (Frog, Chicken, Human, Butterfly).

School News and Reminders

- This year, year 5 will not have an exam week at the end of the term. Trying to study for and write all exams in one week has been stressful and unproductive for students. Instead, we will be doing shorter unit assessment tests regularly in class. It is important that students attend school and make up for missed tests.
